

Service

Medical Devices

We'll work with you from start to finish, ensuring that the statistical aspects of your project are in accordance with ICH/GCP and internal SOPs as well as complying fully with MHRA regulations.

That service might include any or all of the following:

- Research strategy development
- Developing the protocol's statistical and design aspects
- Handling ethics approvals
- Computer aided detection and analysis
- Writing the statistical analysis plan and related information for the Data Monitoring Committee and Trial Steering Committee as required
- Writing reports for publication or submission to regulatory agencies.

Of course our Medical Devices service is just one of many ways in which we can compliment your own team's very specific strengths and specialisms. Equally importantly, we find our research partners come to value the peace of mind to be found in working closely with a team for whom co-operation in a common purpose is a way of life – and the only way we work.

Please don't hesitate to get in touch, talk through the possibilities, and ask us to provide a quote for this or one of our other statistical services.

**Other services****Preclinical and Clinical Trials**

From developing research strategy and the protocol's statistical and design aspects to ethical approvals and submissions for publication or regulatory approval.

Data Management and Database Developments

We will work with you and your team on the management of your data from start to finish of the trial, adhering to ICH and all other regulatory standards to ensure you get all the data you need in the format your study requires.

Observational Studies and Electronic Patient Records

From case series to hypothesis generation and beyond, we'll work with you to validate your epidemiological ideas and make the best possible use of your data.

Health Technology Assessment

Specialist expertise in the evaluation of novel drugs, medical technologies and diagnostics to support your HTA submissions and assist in achieving reimbursement.

Have you got a project that might benefit from our help?
